# SREYNICH CHHOEURN

WEB DEVELOPER

## ABOUT ME

I am Sreynich Chhoeurn, a second-year Web Development student at Passerelles Numériques Cambodia (PNC). I have experience in front-end and back-end development and enjoy creating easy-to-use and clear web applications. I am eager to contribute to projects and improve my skills as a web developer.

## PERSONAL DETAILS

- Name : Sreynich Chhoeurn
- Date of birth : 22<sup>nd</sup> August 2005
- Nationality : Khmer
- Gender : Female
- Place of birth : Pursat Province
- Mariel status : Single

## PROJECT EXPERIENCE

### Open Development Cambodia (ODC) – Web Development Intern

**Project:** cambodiaigf.kh Website | **Role:** Web Developer

**Date:** 22 Oct 2025 – 4 Dec 2025

**Technologies:** Figma, HTML, CSS, Tailwind CSS, JavaScript, WordPress (Sage/Blade), Database (Docker), GitHub, GitBoard

- Developed the Home page with a live countdown, smooth animations, responsive layout, and reusable components using Tailwind CSS.
- Built the Partner page with animated partner logos, dynamic content posting in WordPress, and responsive design for all devices.
- Collaborated with team members and supervisor to integrate pages with backend content management and ensure high-quality website performance.

### Virtual Company 2 (VC2) – QR Code Menu App

**Role:** Flutter Mobile Developer | **Date:** 21 Jun 2025 – 29 Aug 2025

**Technologies:** Flutter, Laravel, MySQL

- Developed a user-friendly mobile app that allows customers to easily view menus on Android devices.
- Integrated the app with backend systems to ensure real-time menu updates and support for multiple languages.
- Collaborated with the team to identify issues, implement new features, and improve overall app performance.

### Virtual Company 1 (VC1) – POS System

**Role:** Web Developer | **Date:** 25 Feb – 02 May 2025

**Technologies:** PHP (MVC), MySQL, HTML, CSS, JavaScript, AWS

- Developed a POS system with real-time inventory and sales tracking.
- Ensured backend reliability and smooth database operations while working collaboratively with the team.
- Deployed and managed the app on AWS, improving security and scalability.

# DEVELOPMENT TOOLS

- Git
- Jira
- AWS
- Figma
- Canva
- GitHub
- AI Tools
- Postman
- MS Office
- WordPress
- Netlify / Vercel

# TESTING SKILLS

- API Testing with Postman
- Bug reporting (Jira, GitHub Board, or others)
- Basic knowledge of software testing life cycle (STLC)
- Writing and executing test cases

# SOFT SKILLS

- Creativity
- Work ethic
- Teamwork
- Leadership
- Adaptability
- Communication
- Problem-solving

# LANGUAGES

- Khmer: Native
- English: Intermediate

# INTERESTS

- Coding
- Creativity
- Designing
- Researching
- Volunteering
- Learning new programming languages

## Cloud Hosting – WordPress Deployment

**Role :** DevOps (Solo Project) | **Date :** 12 Jan – 26 Jan 2025

**Technologies :** AWS, Linux Ubuntu, MobaXterm, WordPress

- Deployed and managed WordPress on AWS EC2 using Linux Ubuntu and remote terminal tools.
- Showcased full DevOps skills by setting up servers, configuring DNS, and improving system performance.

## Weather App

**Role :** Front-End Developer | **Date :** 12 Jan – 26 Jan 2025

**Technologies :** JavaScript, HTML/CSS, Weather API

- Designed and built a responsive user interface to show live weather data using an API.
- Used JavaScript and custom styles to make the app interactive and user-friendly.
- Helped with app deployment and tested it on different screen sizes to ensure usability.

## Web Design

**Role :** Team Leader & Web Developer | **Date :** 21 Sep – 04 Nov 2024

**Technologies :** HTML, CSS (SASS), Figma, GitHub, Netlify

- Led the team in planning and developing a responsive user interface to ensure a smooth user experience.
- Deployed the final design on Netlify for public access and demonstration.
- Used Git and GitHub for version control, collaboration, and managing project updates effectively.

## Portfolio Website

**Role :** Vibe Coder | Personal Project

**Technologies :** ChatGPT, Bolt

- Enhanced content clarity and engagement by leveraging ChatGPT for dynamic and interactive text.
- Developed and managed website content efficiently using the Bolt platform.
- Improved user experience by organizing content clearly and making the website easy to navigate.
